we decided upon coinurtctsing a pipe where the player will toss a di downward. The number on that di will indicate the number of cards the player will recieve. the object of this game is to score pairs,with prize money being awarded. The only failures for the player in this game would be to roll a 1 (no pairs possible) or not getting any pairs. The maximum pairs you could get would be 3 (top prize), 2 second and 1. That is our game.

HEY MR. ORR and class! We have decided to do our prejcot based on pulling certain coloured balls out of a pretty box. There will be different coloured balls and different probabilities of each. The point of the game is to pick out a certain colour, and if you get the indicated colour, you win a prize! Kay bye.

Allie and I will be doing a game with two dice and possibly tubes, not sure yet. Anyway the pealyr will roll the dice and if they roll two 1s (snake eyes), they will win \$3. If they roll two 3s (pawprints), they will win \$1. If they roll neither, they will lose \$1. We will be calling this game Paweyes & Snakeprints.

Our game involves a pair of dice and a deck or cards from 2-10. You are dealt 3 cards you get to chose etheir one or two of the three, then you roll the dice. If the sum of the dice equal etheir your one or two of the cards you win. But if you roll a sum of 11 or 12 you lose. [lrrjzehkhro.com](http://lrrjzehkhro.com) [dirdshvhas](http://dirdshvhas)
