Thanks for coming to the site and checking everything out. The Forums are now open and I have been watching the back end. This page IS being monitored by Unknown people who are not "Bots". Take it for what ever you want and watch what you say. You are not protected against the patriot act just for being "American". I Love you all and good luck on your journey. I have been having "visions" if you will about this moment my whole life. I actually thought this was going to start 10 years ago. Opps. my bad. I have found many truths and will be sharing as many as I can here that I feel will change the world for the better of the 99%.

I can not speak for the rest of the 99% for i am but a piece of sand on a beach but here are my demands.

1: Separate the prision systems from the violent and non-violent, so violent offenders are not mixed with non-violent prisoners. ALL prisons turned to NON-PROFIT. No one would put spoiled milk in good milk or vise versa.

2: Recognizable measures to distinguish the difference between "Police" officers and "Peace" officers. All Government Security Forces MUST wear a camera when engaging contact with a citizen for any reason what so ever. In the new world of big brother We The People deserve to be protected & not Hunted.

3:Complete Separation Of Church & State to protect Our Children and erase the veil for predators to hide behind and make it a criminal crime to witness a crime on a child & not report it.

4:Complete and total Government take over of all of Americans resources for energy that supply the foundation & freedom in the New World to achieve Prosperity & Happiness. The ingredient to sustain Life Liberty & the Pursuit to happiness is a right endowed to each and everyone of us by our creators and can not be given nor taken away. This is also an ingredient that can not be a \$variable that changes. Protecting Americans Power issues , Lowers stress , provides a safe mental , physical , and spiritual being. This CAN be achieved for next to nothing and cost next to nothing to run. Greedy men choose money over morality and people are dying today because of it.

Complete and total American Government Takeover of any and all monetary actions. Create a Database of American Homegrown Family Farmers & Suppliers to put into a database with and easy to use FREE user platform and social intranet networking program that allows to pick and choose who retailers & consumers buy from within America. Choosing to buy from the people closest to you will lower costs and decrease confusion, Thus raising American Productivity. Change to a 100% American Currency. 20%

Foreign tax rate for everything entering the United States. 5 year Tax Break On All "New" Grassroots Homegrown American Family Businesses. (at least 3 members of a same sur-name must be employed)

=====
